CRA LCRMSCP TourInvite 10-21to23-14.docx

Jared:

It was good to see you and the rest of the EPA team Monday. I think it might be useful if someone at EPA working on comments to the BDCP could see some of the Lower Colorado River Multi-Species Conservation Plan (LCRMSCP) based on our discussions. I know everyone is pretty busy but there is an upcoming tour (10/21-23) being provided that you or your staff might find interesting if it works out timing wise. If not, there is a lot of great information on the website for the MSCP. Much of what we did on the MSCP was modeled on the work done for the Platte River which is another complex HCP approach to species issues. I have attached an invite to the upcoming tour to this email if there is interest. If you or your staff would like some follow up information on the MSCP, I would be happy to connect them to the staff directly working on the project.

I look forward to working with EPA on getting the BDCP accomplished. All best,

Jeff
